Art Unit: 3712

The information disclosure statement filed Sep. 10, 2001 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

* * * * *

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is confusing since it indicates that the trigger mechanism engages and releases the bow string, rather than the jaws; it is not clear how the trigger mechanism is related to the jaws.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant

Art Unit: 3712

for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claim 15 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Summers 6,205,991.

Claims 15-20, & 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bankstahl 5,417,197.

Claims 12-14 are allowed.

Claims 1-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 21 & 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not disclose a bow string release including a pivot ball mounted on a center member; a pair of jaws which receive the pivot ball; the jaws received in a jaw cup having a floor having a central orifice for receiving the center member; and a trigger mechanism.

Art Unit: 3712

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references show how string releases with jaws.
